MPC® and HYDRON® Cleaning Technologies to be Featured by ZESTRON at Semicon West

Manassas, VA – July 2, 2018 [ZESTRON](#), the global leading provider of high precision cleaning products, services and training solutions in the electronics manufacturing and semiconductor industries, will be featuring its leading [MPC®](#) and [HYDRON®](#) cleaning technologies at the Semicon West Expo.

Uncover the advantages of water-based [MPC®](#) and [HYDRON®](#) Technologies. ZESTRON offers water-based process solutions for cleaning power electronics such as DCBs, IGBTs, discrete components on leadframes, and Power LEDs. Remove particulates and impurities resulting in improved surface activation for bonding, excellent wetting characteristics, residue-free drying and overall increased product yields. Eliminate hazardous solvents without sacrificing results.

The Semicon West Expo will be held at the Moscon Center in San Francisco, CA on July 10th through July 12th. Visit [ZESTRON](#) at booth 5673 to find out more information on its leading cleaning technologies. For more information or to register, please visit [semiconwest.org](#).

About ZESTRON:

Headquartered in Manassas, Virginia, and operating in more than 35 countries, ZESTRON is the globally leading provider of high precision cleaning products, services and training solutions for the electronics manufacturing industry. With eight worldwide technical centers and the largest team of chemical engineers in the industry, ZESTRON's commitment to ensuring that its customers surpass even the most stringent cleaning requirements is without equal.

For additional information and to tour one of our unparalleled technical centers, please visit [www.zestron.com](#).
