## Bentek Solar Ships First Orders for Its Circuit Breaker Re-Combiners

**SAN JOSE, CA — September 2010** – Bentek Solar, a leader in the design and manufacture of optimized Configure-To-Order solar combiners and re-combiners, announces that it has shipped its first industry-leading re-combiners that use circuit breaker technology, eliminating the need for standard fuses.

“There are no fuses with these 100 percent circuit breaker re-combiners, which provide maximum performance and maximum safety with UL 489 breakers. The breaker serves as a disconnect in addition to providing circuit protection to our customers,” said John H Buckley, leading the sales and marketing at Bentek Solar.

Bentek Solar’s re-combiners provide the final interface to the inverter on large commercial or utility PV systems and feature a flexible design for customization and ease of installation as well as an enhanced level of user safety.

For more information about Bentek Solar’s Circuit Breaker Re-Combiners or to view the online data sheets, visit [www.BentekSolar.com](http://www.BentekSolar.com).

**About Bentek Solar**

Founded in 1985, Bentek is a leader in manufacturing and engineering solutions for complex electro-mechanical and power distribution systems for the semiconductor and solar industries. Bentek has applied these extensive capabilities and knowledge into a comprehensive family of standard and configure-to-order (CTO) solar combiner products. These solar combiners provide quality, ease of installation and safety to the solar industry.
