iNEMI Opens New Headquarters in North Carolina

Morrisville, North Carolina (November 15, 2018) — The International Electronics Manufacturing Initiative (iNEMI), a worldwide industry-led consortium, today announced it has relocated its headquarters office from Herndon, Virginia, to Morrisville, North Carolina.

iNEMI started exploring options for a new headquarters location earlier this year because the Herndon office building where iNEMI had been headquartered since 1996 was put up for sale with all leases terminating at the end of 2018. After an extensive review, the search committee decided that the Greater Raleigh/Research Triangle Park area would be the most advantageous location for iNEMI.

“We took this opportunity to explore a number of locations, assessing several factors, such as proximity to members and academic research centers, access to transportation, leasing costs and more,” said Marc Benowitz, iNEMI CEO. “In the end, the Greater Raleigh/Research Triangle Park area topped the list in terms of meeting our needs. We are now officially open in our new headquarters location and are looking forward to becoming a part of the research community in this dynamic and growing area.”

The iNEMI office is located at

3000 RDU Center Drive, Suite 220
Morrisville, NC 27560 USA
+1 984.333.0820
infohelp@inemi.org

This office serves as the headquarters for the corporate membership-based iNEMI, which is an R&D consortium comprised of leading electronics manufacturing companies and related organizations. The initial staff located in the North Carolina office are Edward (Ed) Jollie,

(more)

Director of Business Administration and Operations, and Kristin Christensen, Office Administrator.

About iNEMI

The International Electronics Manufacturing Initiative's mission is to forecast and accelerate improvements in the electronics manufacturing industry for a sustainable future. The consortium is made up of more than 90 manufacturers, suppliers, industry associations and consortia, government agencies, research institutes and universities. iNEMI roadmaps the needs of the electronics industry, identifies gaps in the technology infrastructure, executes collaborative projects to eliminate these gaps (both business and technical), and stimulates standards activities to speed the introduction of new technologies. The consortium also works with government agencies, universities and other funding agencies to set priorities for future industry needs and R&D initiatives. iNEMI is based in Morrisville, North Carolina (in the Greater Raleigh/ Research Triangle Park area), with regional offices in Asia (Shanghai and Tokyo) and Europe (Limerick and the London area). For additional information about iNEMI, visit <http://www.inemi.org>.
