

## Koh Young Announces its Future Forum 2023 Webinar on "Powered by Generative AI: Accelerating Inspection Advancements"

Seoul, Korea – Koh Young, the industry leader in True3D<sup>™</sup> measurement-based inspection solutions, is pleased to announce registration is open for the next installment of its captivating Future Forum webinar series focused on

how Generative AI or GenAI is accelerating inspection advancements. This exclusive online event promises to be a valuable and insightful experience, tailored to enrich your understanding of GenAI with discussion and demonstrations on October 30<sup>th</sup> and November 1<sup>st</sup> in multiple languages. Koh Young's Sarah Chi will host the English sessions and ZHIQUAN Chi from the Koh Young China team will host the Chinese session.

Inspection plays a pivotal role in manufacturing, as it is essential to ensure that products conform to established standards and customer expectations. Nevertheless, effective quality control faces various challenges, including inconsistent inspections,

human errors, and process complexity. The root cause of inconsistent inspections can be attributed to the sheer complexity and volume of manufacturing processes, making it difficult for human inspectors to detect every defect.

GenAl is a promising solution to address these challenges because its advanced algorithms excel at analyzing extensive datasets and swiftly identifying defects and anomalies that may elude manual inspection. GenAl-powered tools can prove invaluable by continuously monitoring real-time data sources, analyzing information, and identifying potential issues with minimal human intervention. By employing this technology, you can ensure that your customers receive products of the highest quality, free from defects.

The webinar will include two (2) sessions in English across different time zones, as well as another session in Chinese. Following the presentation, Koh Young experts will be available in a live Q&A. You can submit specific questions during registration for our panel to address during the webinar. You can secure your seat at www.kohyoung.com or by registering through the links below. While the webinar is free of charge, pre-registration is required.

Date	Time	Language	Registration
Monday 30 Oct 2023	1:00PM EDT	English	https://us06web.zoom.us/webinar/register/4416935520504/WN_TYJGuvGnSi2w76LgwrJycw
Wednesday 01 Nov 2023	4:00PM BJT	Chinese	https://meeting.tencent.com/dw/XsNWveumelkk?ch=2PVdSjnyv0QBU
Thursday 02 Nov 2023	9:00AM CEST	English	https://us06web.zoom.us/webinar/register/WN_zq9GAr8gQZWCjvd8194Jnw

You do not want to miss this exceptional learning opportunity at the Koh Young Future Forum 2023 webinar. If, for any reason, you are unable to attend, you can still explore Koh Young's award-winning solutions by visiting our website at www.kohyoung.com. We eagerly anticipate your participation in this upcoming installment of our enlightening webinar series, as we continue our year-long journey of learning, progress, and exploration together!

## ###

## About Koh Young Technology, Inc.

Established in 2002, Koh Young revolutionized the inspection market by launching the industry's first 3D Solder Paste Inspection (SPI) system using a patented dual-projection Moiré technology. Since then, it has become the global leader in 3D measurement-based SPI and Automated Optical Inspection (AOI) equipment for the electronics industry. Based on its True3D<sup>™</sup> measurement-based inspection technology, Koh Young has developed innovative inspection solutions for challenges with machined parts, press-fit and through-hole pins, conformal coatings, dispensed materials, and semiconductor packages. Through its constant innovation, Koh Young has secured over 3,700 global customers, and commands the dominant global market share position in the SPI and AOI markets with well over 22,000 machine installations. By adopting a user-centric R&D focus, it continues to use its core competencies to develop innovative solutions for new and existing markets by listening to our customers and researching emerging trends and applications. From the headquarters in Korea, activities spread across the world through its global sales and support infrastructure spanning Europe, Asia, and the Americas. These regional offices ensure Koh Young stays close to the market, and more importantly, its growing user base. Learn why so many electronics manufacturers trust Koh Young for reliable inspection for a smart factory at our website kohyoung.com.
