Meet CML Microcircuits at Embedded World 2019

Maldon, Essex – 23 January, 2019 - CML Microcircuits is pleased to confirm it will be exhibiting at the Embedded World trade fair at the Exhibition Centre, Nuremburg, 26th to 28th February 2019.

Attendees are invited to meet Martin Grossman, Area Sales Manager at CML in Hall 3A, Booth 3A-435 to learn more about its wide range of RF, PMR and Digital Voice solutions.

CML Microcircuits will be co-located with its German distribution partner, SE Spezial-Electronic GmbH, on Booth 3A-435, where visitors can discover why CML is a leader in narrowband communications targeting digital and analogue voice and data applications. A wide selection of the company's product portfolio will be presented, with access to its technology experts.

The engineering community attending the trade fair will have the opportunity to experience the company's technology and learn more about its latest solutions, including the CMX655D Ultra-low Power Digital Voice Codec and CML's range of Building Blocks.

"We are extremely excited to be exhibiting at Embedded World 2019", commented Martin Grossman, CML Microcircuits. "The trade fair is the perfect opportunity to meet engineers looking to work with an expert in narrowband solutions and we look forward to explaining why so many leading manufacturers already value our products and services."

Embedded World has risen to become the most important and well-attended technical conference and trade exhibition in the embedded electronics industry. This year is expected to build on last year's success, which saw over 32,000 attendees and more than 1,000 exhibitors.
