## Cetec ERP Director of Sales to Host ERP Best Practices Round Table during WHMA Conference

**AUSTIN, TX — January 2023** — Cetec ERP, a leading cloud ERP software provider, is pleased to announce that Jordan Jolly, Director of Sales and Implementation, will host a round table during the Wiring Harness Manufacturer's Association (WHMA) Conference. The event is scheduled to take place Feb. 14-16, 2023 in Albuquerque, New Mexico.

Jolly will host the round table discussion entitled, 'Making ERP Less Evil: An ERP Best Practices on Wednesday, Feb. 15<sup>th</sup>. ERP systems might be described as a "necessary evil". If they are necessary, in what ways do you think they could be made less evil? What lessons have you learned over the years?

Jolly has been directing ERP implementations for the electronics industry for more than 10 years, and has seen numerous different situations, successes and failures. He would love to share those experiences with a round table and potentially learn from others' experiences as well.

Over the past 30 years, the WHMA Annual Wire Harness Conference has become one of few investments that give an opportunity to learn, grow, share, and discover new approaches to many aspects of the wire harness industry. The conference features a number of timely presentations on topics important to wire harness manufacturers, OEMs and suppliers. It also includes peer-to-peer networking, best-practices roundtables, a technical education workshop and an Exhibit Hall with industry leading suppliers. It's a conference you do not want to miss!

Cetec ERP's leading-edge system helps customers handle stringent regulatory requirements and track dynamic production environments, all from a single, friendly web interface. All modules, support, maintenance and upgrades are included in the monthly subscription.
