Meyer Burger's FABiA® Cell Deposition Equipment wins Solar + Power Award 2018

The FABiA® coating system developed by Meyer Burger was awarded this year's Solar + Power Award in the category Solar PV Process Award during the EU PVSEC in Brussels.

The Solar + Power Award annually recognizes innovative manufacturing and product solutions within the entire value chain of the PV industry. Meyer Burger's process engineer Valdimir Breus (left) and development engineer Marcel Leonhardt (middle) accepted the award during the ceremony from Michael McCarthy (CEO of the Irish Solar Energy Association).

[FABiA®](#) cell deposition equipment is the only passivation machine on the market which combines three processes in one tool and offers benefits for future upgrades as a flexible modular system for mass production. FABiA® is qualified for PERC, PERx, p-type and n-type cell concepts, as well as for mono- and multi-crystalline wafers. The new FABiA® combines all market proven benefits of Meyer Burger's industry leading MAiA® passivation technology which has over 30GW equipment installed and in operation globally. This makes FABiA® the ideal technological platform to deliver top quality passivation processes for reduced overall production costs while ensuring customers a high return on investment. Advanced interfaces and no vacuum breakage provide further improved cell passivation, resulting in increased cell efficiency and equipment reliability, which significantly reduces overall costs throughout the operational cycle.

MEYER BURGER

About Meyer Burger Technology Ltd

www.meyerburger.com

Meyer Burger is a leading global technology company specialising on innovative systems and processes based on semiconductor technologies. The company's focus is on photovoltaics (solar industry) while its competencies and technologies also cover important areas of the semiconductor and the optoelectronic industries as well as other selected high-end markets based on semiconductor materials. As an international premium brand, Meyer Burger offers its customers in the PV industry superior products and innovative solutions for the manufacturing processes of wafers, solar cells and solar modules. The company provides substantial added value to its customers and clearly differentiates itself from its competitors by focusing on core technologies of the value chain.

Meyer Burger's comprehensive product portfolio is complemented by a worldwide service network with spare parts, consumables, process know-how, customer support, after-sales services, training and other services. Meyer Burger is represented in Europe, Asia and North America in the respective key markets and has subsidiaries and own service centres in China, Germany, India, Japan, Korea, Malaysia, the Netherlands, Switzerland, Singapore, Taiwan and the USA. The company is also working intensively to develop new markets such as South America, Africa and the Arab region. The registered shares of Meyer Burger Technology Ltd are listed on the SIX Swiss Exchange (Ticker: MBTN).
