ECTC Abstracts Submission Extended to 1 November 2020

*The premier international packaging, components, and
microelectronics systems technology conference*

As the ECTC team prepares for the 2021 conference, the ongoing global COVID-19 pandemic and the impact that it continues to make have been a constant factor in our planning. Based on the high risks of domestic and international travel and large gatherings that are highly likely to continue well into 2021, the ECTC leadership has made the decision to move to an all-virtual platform for ECTC 2021.

Take advantage of this two-week extension! You are invited to submit an abstract proposal about new developments and technology related to the following:

- Applied Reliability
- Assembly and Manufacturing Technology
- Emerging Technologies
- RF, High-Speed Components & Systems
- Interconnections
- Materials and Processing
- Packaging Technologies
- Photonics
- Thermal/Mechanical Simulation and Characterization
- Interactive Presentations

Submission Guidelines

The content must be original, previously unpublished, non-confidential and without commercial content.

All abstracts and proposals must be submitted electronically at our [website](#) by 1 November 2020. [Click here for additional information](#). Selected authors and instructors will be announced by 11 December 2020.

Abstracts

All accepted papers and interactive presentations will be included in the virtual conference and documented in *IEEE Xplore* digital database. Abstracts must have 250-750 words.
