### **SVTronics Implements New DAGE Assure Intelligent X-ray Component Counter in Production**

**Plano, TX USA – June 2021** - Nordson X-ray, a division of the [Nordson Corporation](#) (Nasdaq: NDSN) is pleased to announce a successful installation of the Assure™ intelligent X-ray component counter to SVTronics. The company purchased the Assure™ from Nordson X-ray, part of Nordson TEST & INSPECTION, and the sale was facilitated by manufacturers' representative Southwest Systems Technology.

SVTronics is a leading manufacturing company that offers full turnkey electronics manufacturing services. The company specializes in custom electronic products for applications including embedded, industrial, medical, military, automotive, etc.

Chris Dickey, VP of Sales & Marketing, SVTronics, commented: "Anytime we can reduce manual labor on the manufacturing floor it's a win for everyone – the company as well as the customers."

Inventory knowledge is essential for modern industry. Live assurance of correct inventory in your MRP system at all times minimizes stock, labor, errors and costs ensuring customer confidence and trust to keep SMT lines running efficiently.

"SVTronics is a perfect match for the Assure product line," stated Todd O'Neil, Business Development Manager for Nordson X-ray. "They are a state-of-the-art facility, having a wide

diversity of PCB assemblies with tremendous flexibility and, like most other manufacturers, they spend endless hours counting components.”

After viewing several options, ultimately, SVTronics decided on Assure to facilitate a seamless integration into their day-to-day process. Assure is an intelligent, simple, fast, and trustworthy, automated component counter enabling an increase in productivity, minimizing component shortage and SMT line downtime, multiple set-ups and expensive additional component procurement and safety stock.

SVTronics is a leading manufacturing company that specializes in full turnkey electronics manufacturing services. The company serves a variety of market segments and offers tailored solutions to each customer based on their requirements. SVTronics can assist with the complete electronics product development lifecycle from conceptual drawing through production and after-market services.
