

ZESTRON South Asia announces 2022 Cleaning Webinar Series Cleaning Requirement for better Efficiency and Reliability

ZESTRON, the global leading provider of high precision cleaning products, services, and training solutions in the electronics manufacturing and semiconductor industries, today announces the Zestron Academy 2022 Cleaning Webinar Series.

About ZESTRON:

ZESTRON is founded in Ingolstadt, Germany and operates in more than 35 countries. With eight technical centers worldwide and the industry's most knowledgeable team of engineers focused on high precision cleaning, ZESTRON's commitment to ensuring that its customers surpass even the most stringent cleaning requirements.

The latest trend has imposed many changes to the manufacturer and one of them is the cleaning process. Cleaning is a critical process in the electronics manufacturing industry today. For example, many PCB manufacturing processes involve multiple thermal cycles which could impact the cleaning process. With Zestron cleaning agents, it will help to remove the contaminants that are potentially harmful such as solder paste residues, flux residues and adhesive residues.

ZESTRON webinar will showcase the importance of cleaning in various electronics assembly process, together with an application guide to achieve optimal cleaning result in each cleaning processes.

Learn more about electronics cleaning in ZESTRON FREE webinar series:

- 24th Mar Limitations of cleaning with DI water only
- 1st July PH neutral cleaning agents market expectation and field performance
- 23rd Sep How to select an appropriate cleaning system and process
- 25th Nov Impact of high peak reflow temperature on flux removal of high Pb solder paste

This webinar will start at 3pm MYS time (GMT+8), for a duration of about 45 minutes inclusive of Q&A session.
