

Uyemura Boosts Field and Met Lab Teams

February 20, 2024. Southington, CT. Uyemura has announced an important field promotion, and a new addition to its Connecticut Tech Center Engineering Team. Both actions are in support of the company's increasing focus on IC substrates, and its role as a supplier to wafer manufacturers, semiconductor fabs and PWB customers.

Russ Schwartz, a Uyemura Senior Mechanical Engineer with 20+ years experience, has been promoted to Project Engineer. Prior to joining Uyemura, Schwartz worked in every stage of wafer fabrication during tenures at Intel and Motorola. In his new position, he will qualify and maintain process lines, assure chemistry performance, and provide mechanical expertise for the design and installation of Uyemura equipment.

Steve Medd is also a veteran of the semiconductor industry, with 15 years experience. At IBM and Entegris, he held posts in applications engineering and process engineering, respectively. In his new

position as Uyemura Support Engineer, he provides customer support at the Tech Center metallurgical lab.
