Heraeus Electronics Announces Interactive Cermet Thick Film Workshop, September 17–18, 2025

Conshohocken, Pennsylvania, August 2025 – Heraeus Electronics today announced its upcoming Interactive Cermet Thick Film Workshop, taking place from September 17–18, 2025 at the Heraeus Electronics Application Center in Conshohocken, Pennsylvania.

For more than eight decades, Cermet Thick Film technology has shaped the electronics industry by combining ceramic and metal materials in innovative designs, sparking a manufacturing revolution. While simple in concept, mastering thick film technology is a science—and as the field continues to evolve, staying current is essential for success.

Heraeus Electronics is a leader in Thick Film materials for circuitry and components. From its foundation in hybrid circuits to its expanded applications in passive components, low-temperature printed electronics, and other specialty fields, thick film technology remains central to advancing modern electronics.

The two-day workshop combines classroom instruction with interactive, in-lab activities and demonstrations, giving participants direct experience with Heraeus Electronics' latest materials and technologies. Attendees will leave with practical strategies to apply in their own manufacturing environments.

Highlights include:

- **Expert-led sessions** on the science and applications of cermet thick film technology.
- **Hands-on demonstrations** with state-of-the-art equipment in Heraeus Electronics' Application Center.
- A **guided factory tour** to see thick film manufacturing in action.
- **Networking opportunities**, including a group outing on the evening of September 17.

Space is limited to maintain an interactive format. Registration includes two nights of lodging, lunches, dinner on the first evening, and a comprehensive course workbook. To learn more or to register for the event, visit <https://www.heraeus-electronics.com/en/het-LP/2025-interactive-thick-film-workshop-conshi-Fall/>.

About Heraeus

The Heraeus Group is a broadly diversified and globally leading family-owned technology company, headquartered in Hanau, Germany. The company's roots go back to a family pharmacy started in 1660. Today, Heraeus bundles diverse activities in the Business Platforms Metals and Recycling, Healthcare, Semiconductor and Electronics as well as Industrials. Customers benefit from innovative technologies and solutions based on broad materials expertise and technological leadership. In the 2022 financial year, the group generated revenues of €29.1 billion (US\$30.6

billion*) with approximately 17,200 employees in 40 countries. Heraeus is one of the top 10 family-owned companies in Germany and holds a leading position in its global markets. (* calculated with 2022 average exchange rate, 1€ = 1.0530 US\$)

About Heraeus Electronics

Heraeus Electronics is a leading manufacturer of materials for the assembly and packaging of devices in the electronics industry. The company develops material solutions for the automotive, power electronics and advanced semiconductor packaging market and offers its customers a broad product portfolio - from materials and material systems to services.
