

QT9 Software to Showcase Pre-Validated ERP Platform at MODEX 2026

Visit Booth A1105 to Experience Centralized Control, Real-Time Data, and Complete Traceability for Regulated Manufacturers

[QT9 Software](#), a global technology leader in Quality Management Software, ERP, and MRP solutions, will showcase its QT9 ERP platform at MODEX 2026, taking place April 13–16, 2026, in Atlanta, GA. At booth A1105, attendees will see how QT9 ERP unites life sciences, medical device, pharmaceutical, biotechnology, and other regulated manufacturers under a single, comprehensive system that centralizes operations, streamlines compliance, and delivers end-to-end visibility across the enterprise.

QT9 ERP is an all-in-one Enterprise Resource Planning solution with more than 25 built-in modules and seamless integration with QT9's QMS suite, helping organizations optimize resources, strengthen regulatory control, and accelerate growth while maintaining real-time traceability from raw materials through finished goods. Its embedded workflows, advanced automation, and centralized dashboards connect data across modules so users can eliminate manual processes, reduce human error, and gain at-a-glance visibility to proactively manage production, capacity, and quality in real time.

With a pre-validated architecture that delivers FDA 21 CFR Part 11 electronic approvals out of the box, QT9 ERP helps customers avoid costly validation projects, speed implementation, and reduce reliance on consultants, whether deployed in the cloud or on-premise in a secure, audit-ready environment. Secure employee, customer, and supplier portals provide controlled access to current medical device files, batch documentation, and inspection plans, supporting seamless collaboration across sites and keeping multi-site operations unified and audit-ready. An intuitive interface, dedicated compliance portal, and paperless EBR and MDF generation help teams ramp quickly, reduce errors, and centralize bills of materials, routings, inspection data, job travelers, and approvals, saving time during audits while improving accuracy and on-time delivery performance.

QT9 ERP centralizes operations, provides adaptability, and delivers audit readiness for every regulated environment, helping manufacturers connect quality and operations for real-time data flow and robust traceability. MODEX attendees are invited to visit QT9 Software at booth A1105 in Atlanta to discover how QT9 ERP is redefining operational excellence for the future of life sciences, healthcare, and industrial manufacturing, and to schedule a personalized demo at www.qt9software.com/erp/demo.

QT9 Software:

[QT9 Software](#) is a global technology leader in Quality Management Software, ERP, and MRP solutions, for highly regulated industries such as life sciences, pharmaceutical, medical device,

biotechnology, aerospace, and industrial manufacturing. QT9 Software delivers pre-validated platforms that connect quality and operations for real-time data flow, robust traceability, and compliance with global standards. QT9 Software is recognized by G2 and Gartner for its excellence in quality management solutions. QT9 Software empowers small to mid-sized manufacturers and select enterprises across North America, Europe, and Asia-Pacific. QT9 Software remains committed to driving customer success by expanding its solutions ecosystem and leading the future of compliance and operational excellence in regulated industries.
