## FOR IMMEDIATE RELEASE

## Green Circuits to Spotlight Quick-Turn PCB Assembly and Production Capabilities at SEMICON West 2026

**SAN JOSE, CA — October 2026** — Green Circuits, a full-service electronics manufacturing services (EMS) partner to leading OEMs in aerospace and defense, medical and health technology, industrial electronics, and semiconductor and AI hardware markets, will exhibit at SEMICON West 2026, October 13-15 at the Moscone Center in San Francisco, California. At Booth 3217, the company will highlight its quick-turn PCB assembly, prototyping and low- to medium-volume production capabilities, helping customers bring complex electronic products to market with confidence.

Serving customers in demanding industries where quality, reliability and performance are critical, Green Circuits provides manufacturing support throughout the product lifecycle. Its capabilities help customers transition from initial prototypes to production while maintaining a consistent focus on quality, process control and dependable results.

As electronics manufacturers face increasing demands for faster development cycles and reliable production, access to a responsive manufacturing partner can be essential. Green Circuits combines quick-turn assembly and prototyping services with the flexibility required for low- to medium-volume production, supporting customers as designs evolve and product requirements change.

The company also continues to invest in its manufacturing infrastructure to meet customer needs and support future growth. Its newest investment, a sixth SMT production line, increases manufacturing capacity by 20%. This expansion strengthens Green Circuits' ability to support customer programs while maintaining its emphasis on quality and reliability.

"Helping customers move from prototype to production requires more than assembly capabilities alone," said Adam Szychowski, Chief Revenue Officer of Green Circuits. "It takes a manufacturing partner that understands the importance of responsiveness, technical complexity and consistent quality. Our continued investment in production capacity reflects our commitment to supporting customers as their products and manufacturing requirements evolve."

SEMICON West brings together professionals across the semiconductor and microelectronics supply chains to explore technologies, manufacturing capabilities and industry developments. Green Circuits will

use the event to connect with semiconductor equipment manufacturers, technology developers and other organizations seeking a reliable partner for complex electronic assemblies.
