FOR IMMEDIATE RELEASE

## MIRTEC to Showcase Cutting-Edge 3D Semiconductor Inspection System at SEMICON West 2026

**September 2026** – MIRTEC, the ‘Global Leader in Inspection Technology’, announced its participation in SEMICON West 2026. The premier event will be held from October 13-15, 2026, at the San Francisco Moscone Center. Visitors can find MIRTEC at Booth #6162, where MIRTEC will showcase its advanced semiconductor inspection system MV-9SiP.

### Key Inspection Systems on Display:

#### MV-9SiP

The MV-9SiP Hybrid 3D Inspection System combines 2D vision, 12-projection Digital Blue Light Moiré, and Blue Laser Scanning in a single semiconductor inspection platform. Its proprietary 25MP CoaXPress vision system with 7.7µm resolution precisely inspects 01005 chip arrays, solder balls, bumps, and densely packed packages. The 8-phase coaxial color lighting enhances crack and surface-defect visibility on reflective CSP components, while the blue laser scanner reliably measures highly reflective and low-reflective surfaces.

#### Commitment to Smart Manufacturing

“MIRTEC remains committed to advancing inspection technology and delivering reliable solutions for the evolving needs of electronics manufacturers,” said Roony Kim. “By combining high-precision inspection, AI-driven innovation, and extensive industry expertise, we continue to support demanding applications across the automotive, aerospace, and defense sectors while helping manufacturers achieve greater quality, productivity, and process reliability.”

###

#### About MIRTEC

MIRTEC is a leading global supplier of automated inspection systems for the electronics manufacturing industry. For more information about MIRTEC’s innovative inspection solutions and their participation in SEMICON West 2026 please visit [www.mirtec.com](http://www.mirtec.com)
