LPMS USA Celebrates 10 Years of Innovation, Growth, and Industry Partnerships

Downers Grove, IL – November, 2026 – LPMS USA, a provider of low pressure molding equipment, materials, tooling, and engineering services for electronics protection, is celebrating its 10th anniversary, marking a decade of growth, innovation, and commitment to helping manufacturers implement reliable electronics protection solutions.

Over the past 10 years, LPMS USA has continued to expand its capabilities and industry presence, providing manufacturers with comprehensive low pressure molding solutions designed to improve product durability, manufacturing efficiency, and long-term reliability. Serving industries including automotive, medical, industrial, and consumer electronics, the company offers a complete approach to low pressure molding, from equipment and material selection to tooling, application engineering, and production support.

An important part of LPMS USA's success has been its relationships with industry partners, including Henkel and Bostik. Through continued collaboration, these partnerships have helped LPMS USA provide manufacturers with access to advanced molding materials and technical expertise to address increasingly complex electronics protection requirements.

As part of its 10th anniversary celebration, LPMS USA welcomed representatives from both Henkel and Bostik, who presented the company with awards recognizing the milestone and their longstanding partnerships.

Henkel presented LPMS USA with a 10 Years of Service & Distribution Excellence award, recognizing the company's dedication to partnership, service, and excellence throughout the past decade. Bostik also presented LPMS USA with a commemorative anniversary award in recognition of the company's 10 years in business and their continued relationship.

These recognitions reflect the importance of strong industry partnerships in supporting LPMS USA's growth and its ability to deliver effective low pressure molding solutions to manufacturers across a wide range of applications.

Beyond its industry partnerships, LPMS USA attributes its continued success to the dedication and expertise of its team. From engineering and technical support to sales and customer service, the company's employees have played an essential role in building customer relationships, supporting application development, and advancing the adoption of low pressure molding technology.

As LPMS USA looks toward the future, the company remains focused on expanding its capabilities, strengthening industry partnerships, and helping manufacturers meet evolving electronics protection challenges through innovative low pressure molding technologies.

About LPMS USA

LPMS USA, the leading global provider of low pressure molding equipment, delivers innovative solutions for protecting electronics across the automotive, medical, and industrial industries. Offering over 15 customizable platforms, extensive equipment inventory, and turnkey services, including engineering, tooling, and material selection with a focus on quality, efficiency, and innovation. From R&D to high-volume production, LPMS USA ensures reliability and performance for even the most demanding applications, such as waterproofing electronics.
